A PEEK AT THE NEXT WEEKS

Math: In topics 5 and 6, your child will be learning to subtract within 100 using various strategies. They will also analyze information to model and solve one- and two-step problems. Students are working to become proficient in solving two-step addition and subtraction word problems.

Literacy: Second graders are continuing their work with non-fiction reading and writing. Near the middle of November, we transition to analyzing characters' journeys by noticing lots of things about them- the things they do, how they feel, and what they think.

In writing, students are busy creating pieces on topics that they know a lot about. We just finished our first piece which is an All About Me. Next, they will have the opportunity to write about a topic of their choice. You can help at home by helping them brainstorm things that they are knowledgeable about!

Social Studies/science: Economics will be the next unit in Social Studies. Students will be learning to use bar graphs to compare quantities. We will be taking a look at some of Earth's natural and man-made resources and understand how they can be used in various ways. Additionally, students will learn concepts such as goods and services and producers and consumers.
